Stop

Implementation

Create a WordPress blog containing:

```
<title>My AI Blog</title>
```

```
<a href="https://www.google.com">
```

Visit Google

```
</a>
```

Sample Output

Web Blog Created Successfully

Title: My AI Blog

Link: Visit Google

Result

The web blog was successfully created using WordPress with the required HTML elements.

Conclusion

Thus, a simple web blog was successfully created and basic HTML elements were demonstrated.
